DETAILED ACTION

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 states the limitation "each lower surface signal connector pad on the lid being directly electrically connected to one of the signal connector pads located upon the upper surface of the die" where the phrase "directly electrically connected" means not electrically connected through an intermediate device such as a transistor. This limitation in conjunction with the other claimed structural features was not found to be disclosed or suggested by the prior art. Additionally, claim 11 states the limitations that "the lid further include a conducting strip on the upper surface of the lid that is electrically connected to the bonding strip on the lower surface of the lid" and "the bonding strip on the upper surface of the die and the bonding strip on the lower surface of the lid are made of conducting material and are electrically connected by the bonding material." These limitations in conjunction with the other claimed structural features were not found to be disclosed or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
